# JOY NYAANGA

Chicago, IL | (716) 908-4355 | jnyaan@gmail.com | www.joynyaanga.com

## SUMMARY

Highly driven and results-oriented individual looking to leverage strong analytical skills to solve complex problems. Coming with expert knowledge of the R programming language, ability to work in an interdisciplinary environment, and skill in communicating complex, industry-specific concepts.

## EDUCATION

**Ph.D.** **Northwestern University** – Evanston, IL **Expected 2022**
*Quantitative Biology*

**M.A.** **Princeton University** – Princeton, NJ **2017 - 2018**
*Molecular Biology*

**B.S.** **John Carroll University** – University Heights, OH **2013 - 2017**
*Double Major: Biochemistry; Cell and Molecular Biology*

## SKILLS

**Computing:** R, GitHub, Python, bash, AWS
**Data science:** data analysis, data mining, visualization, dashboarding
**Statistics:** regression models, maximum likelihood, gaussian mixture modeling, model selection

## RELEVANT RESEARCH AND PROJECTS

**Ph.D. Candidate | Northwestern University** **2018 - Present**

- Investigate the genetic variation underlying differences in developmental growth using *Caenorhabditis elegans*
- Collaborate with mathematicians to build mechanistic models to explore complex growth relationships
- Design and optimize a high-throughput experimental platform for the acquisition of developmental traits
- Develop and implement an R package to facilitate handling and visualization of image-based data
- Mentor and train six undergraduate and high school students on independent computational research projects

**Computational Biology/Data Science Intern | Celsius Therapeutics** **Summer 2021**

- Evaluated lineage reconstruction and trajectory analysis methods in single-cell RNAseq data
- Benchmarked and implemented multiple trajectory inference algorithms on clinical-stage data

**Masters Student | Princeton University** **2017 - 2018**

- Probed RNA-protein interactions regulated by 8-oxoG to uncover cellular changes caused by oxidative stress
- Modeled biochemical reactions in Python to study the dynamics of protein networks

**Summer Research Student | Cleveland Clinic** **Summer 2016**

- Computationally identified mutations that altered N-glycosylation in factor VIII, a procoagulant protein
- Constructed plasmids containing mutations of interest

**Undergraduate Researcher | John Carroll University** **2015 - 2016**

- Studied lipid peroxidation of linoleic acid using gas chromatography – mass spectrometry
- Presented results in a university poster competition (awarded special merit)

## SELECT LEADERSHIP & OUTREACH

**Graduate Teaching Assistant | Northwestern University** **2020 - 2021**

- Collaborated with faculty to instruct 100+ students across three introductory biology courses
- Facilitated in-class discussions, and provided verbal and written assessment on course progress

**Campus Tour Guide | John Carroll University** **2015 - 2017**

- Managed correspondence with prospective students and parents
- Demonstrated the importance of clear communication while leading campus walking tours and visit programs
